

KAR PORCELAIN ENERGY POLICY

As Kar Porcelain, we act with a strong sense of responsibility for maintaining an effective Energy Management System within the scope of the design, production, sales, and logistics of tableware products. Across all our operations, we adopt the continuous improvement of energy performance and the achievement of environmental and economic sustainability as fundamental principles.

In this regard, beyond improving energy efficiency, we aim to increase the use of renewable energy sources, transition our energy portfolio toward a low-carbon structure, and expand practices that support the shift to clean energy throughout our organization.

For achieving these objectives, as employees of Kar Porcelain, we commit to:

Monitoring, recording, and evaluating all energy consumption data in alignment with performance indicators and targets defined under our policy, and continuously reviewing and improving our performance;

Providing the necessary information and resources to achieve our established objectives and targets;

Complying with all applicable legal requirements and other obligations related to energy use, consumption, and efficiency;

Supporting design activities and continuous energy performance improvement by promoting the procurement of energy-efficient products and services;

Prioritizing the efficient use of energy and natural resources across all production and operational processes, promoting energy efficiency, and developing renewable energy practices that contribute to reducing our carbon footprint.

We hereby commit to these principles.

Chairman of the Board

Tahsin Aşkan

Vice Chairman of the Board
